Publisher's Note	ix	Artificial selection	105
Preface	xi	Asthma and genetics	108
Contributors	xiii	Ataxia telangiectasia	110
Complete List of Contents	xxi	Atherosclerosis	113
Aarskog syndrome	1	Attention deficit hyperactivity disorder (ADHD)	116
Abetalipoproteinemia	2	Autism Spectrum Disorder	121
ABO blood group system	4	Autoimmune disorders	125
Achondroplasia	6	Autoimmune polyglandular syndrome	128
Adrenoleukodystrophy	9	Bacterial genetics and cell structure	131
Adrenomyelopathy	11	Bacterial resistance and super bacteria	136
Agammaglobulinemia and genetics	13	Bardet-Biedl syndrome	141
Aggression	15	Barlow's syndrome	143
Aging and genetics	17	Bartter syndrome	145
Agricultural applications of genetic engineering	22	Batten disease and genetics	146
Alagille syndrome	26	Beckwith-Wiedemann syndrome	149
Albinism and genetics	29	Behavior and genetics	151
Alcohol Use Disorder	32	Best disease	156
Alexander disease	36	Biochemical mutations	158
Alkaptonuria	38	Bioethics of genetics	160
Allergies and genetics	40	Biofertilizers and genetics	163
Alpha-1-antitrypsin deficiency	43	Bioinformatics	166
Alport syndrome	46	Biological clocks	171
Altruism (population genetics)	48	Biological determinism	173
Alzheimer's disease	53	Biological weapons	175
Amniocentesis	57	Biopesticides	178
Amyotrophic lateral sclerosis	59	Biopharmaceuticals	180
Ancient DNA	62	Bipolar disorder and genetics	184
Andersen's disease	67	Bloom syndrome	187
Androgen insensitivity syndrome	69	Blotting Southern, Northern, and Western	189
Animal cloning	72	Brachydactyly	193
Aniridia	75	BRAF gene	194
Ankylosing spondylitis	77	BRCA1 and BRCA2 genes	196
Anthrax	80	Breast cancer	198
Antibodies and genetics	82	Burkitt's lymphoma	205
Antisense RNA	88	Caenorhabditis elegans	211
APC gene testing	91	Canavan disease	214
Apert syndrome	93	Cancer and genetics	216
Arabidopsis thaliana	95	Cardiomyopathy	222
Archaea	98	Carnitine Palmitoyltransferase II Deficiency	225
Arnold-Chiari syndrome	102		
Arthrogyposis Multiplex Congenita	104		

Genetics and Inherited Conditions

Carpenter syndrome	226	Crouzon syndrome	367
cDNA libraries	228	Cystic fibrosis and genetics	369
Celiac disease	230	Cytokinesis	374
Cell culture of animal cells	234	Dandy-Walker syndrome	377
Cell culture of plant cells.	237	Danio rerio	379
Cell cycle.	240	Deafness and genetics	381
Cell division	243	Depression and genetics	384
Central dogma of molecular biology	247	Developmental genetics	387
Cerebrotendinous xanthomatosis.	249	Diabetes	393
Charcot-Marie-Tooth syndrome	251	Diabetes insipidus	397
Chediak-Higashi syndrome	254	Diastrophic dysplasia	400
Chemical mutagens	256	DiGeorge syndrome and genetics.	402
Chlamydomonas reinhardtii	259	Dihybrid inheritance	404
Chloroplast genes	262	DNA fingerprinting	408
Cholera and genetics.	265	DNA isolation.	411
Chorionic villus sampling	268	DNA repair	415
Choroideremia.	270	DNA replication.	419
Chromatin packaging	272	DNA sequencing technology.	424
Chromosome mutation	276	DNA structure and function	427
Chromosome structure	279	Down syndrome	433
Chromosome theory of heredity	284	DPC4 gene testing	439
Chromosome walking and jumping	289	Drosophila melanogaster	441
Chronic granulomatous disease	292	Duchenne muscular dystrophy.	445
Chronic myeloid leukemia	294	Dwarfism and genetics.	447
Classical transmission genetics	297	Dyskeratosis Congenita	451
Cleft lip and palate.	301	Dyslexia and genetics.	453
Cloning	303		
Cloning vectors	308	Edwards syndrome.	457
Cloning Ethical Issues	313	Ehlers-Danlos Syndrome	459
Cockayne syndrome.	317	Ellis-van Creveld syndrome	462
Colon cancer	319	Emerging and reemerging infectious	
Color blindness	322	diseases.	464
Complementation testing	325	Epidermolytic hyperkeratosis	468
Complete dominance	327	Epilepsy and genetics.	470
Congenital adrenal hyperplasia and genetics	330	Epistasis.	472
Congenital contractural arachnodactyly	333	Escherichia coli and genetics	476
Congenital defects	335	Essential tremor	478
Congenital hypothyroidism.	338	Ethoeconomic issues of gene therapy	481
Congenital muscular dystrophy	340	Ethoeconomic issues of genetic testing	484
Congenital Tracheomalacia	343	Eugenics	487
Consanguinity and genetic disease.	345	Eugenics Nazi Germany.	492
Corneal dystrophies.	348	Evolutionary biology	497
Cornelia de Lange syndrome and genetics	350	Extrachromosomal inheritance	504
Costello Syndrome.	353		
Cowden syndrome	354	Fabry disease	511
Cracking of the genetic code	356	Familial adenomatous polyposis.	513
Cri du chat syndrome	358	Familial Dysautonomia	515
Criminality and genetics	361	Familial Hyperinsulinism	517
Crohn's disease and genetics	364	Familial Mediterranean fever	519

Contents

Fanconi anemia	521	Forbes disease.	531
Fanconi Anemia	523	Forensic genetics	533
Farber disease.	525	Fragile X syndrome and genetics	536
Fibrodysplasia ossificans progressiva.	527	Friedreich ataxia	539
Fluorescence in situ hybridization (FISH)	529		

Complete List of Contents

Volume 1

Preface	xi	Arthrogryposis Multiplex Congenita	104
Aarskog syndrome	1	Artificial selection	105
Abetalipoproteinemia	2	Asthma and genetics	108
ABO blood group system.	4	Ataxia telangiectasia	110
Achondroplasia	6	Atherosclerosis.	113
Adrenoleukodystrophy	9	Attention deficit hyperactivity disorder (ADHD)	116
Adrenomyelopathy.	11	Autism Spectrum Disorder	121
Agammaglobulinemia and genetics	13	Autoimmune disorders	125
Aggression	15	Autoimmune polyglandular syndrome.	128
Aging and genetics.	17	Bacterial genetics and cell structure.	131
Agricultural applications of genetic engineering	22	Bacterial resistance and super bacteria	136
Alagille syndrome	26	Bardet-Biedl syndrome	141
Albinism and genetics	29	Barlow's syndrome	143
Alcohol Use Disorder	32	Bartter syndrome	145
Alexander disease	36	Batten disease and genetics.	146
Alkaptonuria	38	Beckwith-Wiedemann syndrome	149
Allergies and genetics	40	Behavior and genetics	151
Alpha-1-antitrypsin deficiency.	43	Best disease.	156
Alport syndrome	46	Biochemical mutations	158
Altruism (population genetics)	48	Bioethics of genetics	160
Alzheimer's disease	53	Biofertilizers and genetics	163
Amniocentesis	57	Bioinformatics	166
Amyotrophic lateral sclerosis	59	Biological clocks.	171
Ancient DNA	62	Biological determinism	173
Andersen's disease	67	Biological weapons.	175
Androgen insensitivity syndrome	69	Biopesticides.	178
Animal cloning.	72	Biopharmaceuticals	180
Aniridia.	75	Bipolar disorder and genetics.	184
Ankylosing spondylitis	77	Bloom syndrome	187
Anthrax.	80	Blotting Southern, Northern, and Western	189
Antibodies and genetics	82	Brachydactyly	193
Antisense RNA	88	BRAF gene	194
APC gene testing	91	BRCA1 and BRCA2 genes	196
Apert syndrome	93	Breast cancer	198
Arabidopsis thaliana	95	Burkitt's lymphoma	205
Archaea.	98		
Arnold-Chiari syndrome	102		

Caenorhabditis elegans	211	Cowden syndrome	354
Canavan disease	214	Cracking of the genetic code	356
Cancer and genetics.	216	Cri du chat syndrome	358
Cardiomyopathy.	222	Criminality and genetics	361
Carnitine Palmitoyltransferase II Deficiency	225	Crohn's disease and genetics	364
Carpenter syndrome	226	Crouzon syndrome	367
cDNA libraries	228	Cystic fibrosis and genetics	369
Celiac disease	230	Cytokinesis	374
Cell culture of animal cells	234	Dandy-Walker syndrome	377
Cell culture of plant cells.	237	Danio rerio	379
Cell cycle.	240	Deafness and genetics	381
Cell division	243	Depression and genetics	384
Central dogma of molecular biology	247	Developmental genetics	387
Cerebrotendinous xanthomatosis.	249	Diabetes	393
Charcot-Marie-Tooth syndrome	251	Diabetes insipidus	397
Chediak-Higashi syndrome	254	Diastrophic dysplasia	400
Chemical mutagens	256	DiGeorge syndrome and genetics.	402
Chlamydomonas reinhardtii	259	Dihybrid inheritance	404
Chloroplast genes	262	DNA fingerprinting	408
Cholera and genetics.	265	DNA isolation.	411
Chorionic villus sampling	268	DNA repair	415
Choroideremia.	270	DNA replication.	419
Chromatin packaging	272	DNA sequencing technology.	424

Chromosome structure	279	Down syndrome	433
Chromosome theory of heredity	284	DPC4 gene testing	439
Chromosome walking and jumping	289	Drosophila melanogaster	441
Chronic granulomatous disease	292	Duchenne muscular dystrophy.	445
Chronic myeloid leukemia	294	Dwarfism and genetics.	447
Classical transmission genetics	297	Dyskeratosis Congenita	451
Cleft lip and palate.	301	Dyslexia and genetics.	453
Cloning	303		
Cloning vectors	308	Edwards syndrome.	457
Cloning Ethical Issues	313	Ehlers-Danlos Syndrome	459
Cockayne syndrome.	317	Ellis-van Creveld syndrome	462
Colon cancer	319	Emerging and reemerging infectious diseases.	464
Color blindness	322	Epidermolytic hyperkeratosis	468
Complementation testing	325	Epilepsy and genetics.	470
Complete dominance	327	Epistasis.	472
Congenital adrenal hyperplasia and genetics	330	Escherichia coli and genetics	476
Congenital contractural arachnodactyly	333	Essential tremor	478
Congenital defects	335	Ethoeconomic issues of gene therapy	481
Congenital hypothyroidism.	338	Ethoeconomic issues of genetic testing	484
Congenital muscular dystrophy	340	Eugenics	487
Congenital Tracheomalacia	343	Eugenics Nazi Germany.	492
Consanguinity and genetic disease.	345	Evolutionary biology	497
Corneal dystrophies.	348	Extrachromosomal inheritance	504
Cornelia de Lange syndrome and genetics	350		
Costello Syndrome.	353		

Complete List of Contents

Fabry disease	511	Farber disease.	525
Familial adenomatous polyposis	513	Fibrodysplasia ossificans progressiva.	527
Familial Dysautonomia	515	Fluorescence in situ hybridization (FISH)	529
Familial Hyperinsulinism	517	Forbes disease.	531
Familial Mediterranean fever	519	Forensic genetics	533
Fanconi anemia	521	Fragile X syndrome and genetics	536
Fanconi Anemia	523	Friedreich ataxia	539

Volume 2

Galactokinase deficiency	543	Hardy-Weinberg law.	653
Galactosemia	545	Harvey ras oncogene	657
Gaucher disease	548	Heart disease and genetics	659
Gel electrophoresis	550	Hemochromatosis	664
Gender identity	553	Hemophilia	666
Gene families	555	Hereditary diffuse gastric cancer	671
Gene regulation in bacteria	557	Hereditary diseases	673
Gene regulation in eukaryotes	561	Hereditary leiomyomatosis and renal cell cancer	678
Gene regulation in viruses	564	Hereditary mixed polyposis syndrome.	680
Gene regulation: Lac operon	568	Hereditary non-VHL clear cell renal cell carcinomas	682
Gene therapy	571	Hereditary papillary renal cancer and genetics	684
Gene therapy	575	Hereditary Spherocytosis	686
Genetic code	580	Hereditary xanthinuria	688
Genetic code, cracking of	584	Heredity and environment	690
Genetic counseling	588	Hermansky-Pudlak syndrome	695
Genetic engineering	592	Hermaphrodites.	696
Genetic engineering risks	598	Hers disease	699
Genetic load.	601	High-yield crops.	701
Genetic screening	604	Hirschsprung's disease	704
Genetic testing	607	Historical development of genetic engineering	707
Genetically modified foods	611	Historical development of genetics	712
Genetics in television and films	614	Holt-Oram syndrome.	717
Genetics of high-yield crops	617	Homeotic genes	718
Genome size.	619	Homocystinuria	721
Genomic libraries.	621	Homosexuality and genetics	724
Genomic medicine.	625	HRAS gene testing.	727
Genomics	627	Human genetics.	729
Gigantism	630	Human genetics and insurance	735
Gilbert's syndrome.	632	Human Genome Project	739
Glaucoma	634	Human growth hormone	743
Glucose galactose malabsorption	637	Hunter Syndrome	746
Glucose-6-phosphate dehydrogenase deficiency.	640	Huntington's disease	747
Glycogen storage diseases	642	Hurler syndrome	752
Gm1-gangliosidosis	645	Hybridization and introgression.	754
Graves' disease	648		
Gyrate atrophy of the choroid and retina	650		

Hybridomas and monoclonal antibodies	757	Maple syrup urine disease	877
Hypercholesterolemia	762	Marfan syndrome.	880
Hyperphosphatemia	765	Marfan syndrome and genetics.	882
Hypocomplementemic urticarial vasculitis	767	Maroteaux-Lamy syndrome.	884
Hypophosphatemic rickets	769	McArdle's disease.	887
		Meacham syndrome.	889
Icelandic Genetic Database	773	Medical applications of genetic	
Ichthyosis	776	engineering	891
Immunodeficiency with hyper-IgM.	777	Melanoma.	894
Immunogenetics	780	Mendelian genetics	897
In vitro fertilization and embryo transfer	785	Menkes syndrome	902
Inborn errors of metabolism.	789	Metachromatic leukodystrophy	904
Inbreeding and assortative mating	792	Metafemales	906
Incomplete dominance	795	Microarray analysis.	908
Industrial applications of genetic		Miscegenation and antimiscegenation laws.	910
engineering	799	Mitochondrial diseases	912
Infantile genetic agranulocytosis	802	Mitochondrial DNA depletion syndrome	915
Infertility and genetics.	804	Mitochondrial encephalopathy,	
Influenza and genetics.	807	lactic acidosis, and strokelike	
Insurance	810	episodes (MELAS).	917
Intelligence and genetics.	814	Mitochondrial genes	920
Intersex conditions	818	Mitochondrial neurogastrointestinal	
Ivemark syndrome	821	encephalopathy (MNGIE)	923
		Mitosis and meiosis	925
Jackson-Weiss syndrome	823	MLH1 gene	928
Jansky-Bielschowsky disease.	824	Model organisms	930
Joubert syndrome.	827	Molecular clock hypothesis.	933
		Molecular genetics.	935
Kearns-Sayre syndrome	831	Monohybrid inheritance	942
Kennedy disease.	833	Moymoya disease	945
Klinefelter syndrome	835	MSH genes	948
Knockout genetics and knockout mice	839	Mucopolipidosis Type IV.	949
Krabbe disease	841	Muenke Syndrome.	950
		Multiple alleles.	952
Lactose intolerance and genetics	845	Multiple endocrine neoplasias	954
Lamarckianism.	847	Mus musculus and genetics.	957
Landau-Kleffner syndrome	850	Mutagenesis and cancer	961
Lateral gene transfer	852	Mutation and mutagenesis	963
Leigh syndrome	854	Myelodysplastic syndromes	969
Lesch-Nyhan syndrome	856	Myeloperoxidase deficiency	971
Leukodystrophy and genetics	858	Myoclonic epilepsy associated with	
Li-Fraumeni syndrome and genetics	860	ragged red fibers (MERRF)	973
Limb girdle muscular dystrophy.	862	Myotonic dystrophy	975
Linkage maps	865		
Lipoamide Dehydrogenase Deficiency.	867	Narcolepsy	979
Long QT syndrome	869	Natural selection	982
Lynch syndrome.	871	Nazi eugenics	986
		Nemaline myopathy.	989
Macular degeneration	875	Neural tube defects	991

Complete List of Contents

Neurofibromatosis	996	Obesity and genetics	1019
Neurospora crassa	998	Oncogenes	1022
Nevoid basal cell carcinoma syndrome	1001	One gene-one enzyme hypothesis	1025
Niemann-Pick disease	1004	Opitz-Frias syndrome	1027
Noncoding RNA molecules	1007	Organ transplants and HLA genes	1029
Nondisjunction and aneuploidy	1011	Ornithine transcarbamylase deficiency	1033
Noonan syndrome	1014	Orotic aciduria	1035
Norrie disease	1016	Osteogenesis imperfecta and genetics	1038
		Ovarian cancer	1040

Volume 3

Palmoplantar keratoderma	1043	Proteomics and genetics	1144
Pancreatic cancer and genetics	1045	Pseudogenes	1147
Parkinson disease and genetics	1049	Pseudohermaphrodites	1149
Paroxysmal nocturnal hemoglobinuria	1053	Pseudohypoparathyroidism	1152
Parthenogenesis	1055	Punctuated equilibrium	1154
Patau syndrome	1058	Purine nucleoside phosphorylase deficiency	1156
Patents on life-forms	1060	Pyloric stenosis	1158
Paternity tests	1063		
Pattern baldness	1064	Quantitative inheritance	1163
Pearson syndrome	1066		
Pedigree analysis	1069	Race	1169
Pelizaeus-Merzbacher disease	1072	RB1 gene	1175
Pendred syndrome	1074	Refsum disease	1178
Penetrance	1076	Reiter's syndrome and genetics	1180
Periodic paralysis syndrome	1078	Repetitive DNA	1183
Pfeiffer Syndrome	1082	Restriction enzymes	1187
Phenylketonuria (PKU)	1085	Retinitis pigmentosa	1190
Pierre Robin Syndrome	1088	Retinoblastoma and genetics	1193
Plasmids	1090	Rett syndrome	1196
PMS genes	1093	Reverse transcriptase	1199
Polycystic kidney disease	1095	Reverse transcription polymerase chain reaction (RT-PCR)	1201
Polydactyly	1098	RFLP analysis	1203
Polygenic inheritance	1100	Rh incompatibility and isoimmunization	1205
Polymerase chain reaction	1102	RhoGDI2 gene	1208
Polyploidy	1105	RNA interference (RNAi)	1210
Pompe disease	1107	RNA isolation	1212
Population genetics	1110	RNA structure and function	1215
Porphyria	1115	RNA transcription and mRNA processing	1221
Prader-Willi and Angelman syndromes	1119	RNA world	1225
Prenatal diagnosis	1123	Robert syndrome	1229
Prion diseases: Kuru and Creutzfeldt-Jakob syndrome	1126	Rubinstein-Taybi syndrome and genetics	1231
Progressive external ophthalmoplegia	1129		
Prostate cancer and genetics	1131	Saccharomyces cerevisiae	1235
Protein structure	1135	Sandhoff disease	1238
Protein synthesis	1139		

Genetics and Inherited Conditions

Sanfilippo syndrome	1240	Viroids and virusoids	1353
Schizophrenia Spectrum And Other Psychotic Disorders	1242	Von Gierke disease	1356
SCLC1 gene	1245	Von Hippel-Lindau syndrome	1358
Severe combined immunodeficiency syndrome	1247	Von Willebrand disease and genetics	1360
Shotgun cloning	1250	Waardenburg syndrome	1363
Sickle-cell disease	1254	Waldenström macroglobulinemia (WM)	1364
Signal transduction	1259	Walker-Warburg Syndrome	1367
Small-cell lung cancer	1263	Weill-Marchesani syndrome	1368
Smallpox and genetics	1266	Werner syndrome	1370
Smith-Lemli-Opitz syndrome	1270	WHIM Syndrome	1372
Sociobiology	1272	Williams syndrome	1373
Speciation	1275	Wilms' tumor	1375
Spinal muscular atrophy	1278	Wilms' tumor aniridia-genitourinary anomalies-mental retardation (WAGR) syndrome and genetics	1378
Spinocerebellar ataxia	1280	Wilson disease and genetics	1380
SRY gene	1282	Wiskott-Aldrich syndrome and genetics	1383
Stargardt's disease	1284	Wolff-Parkinson-White syndrome	1384
Sterilization laws	1287	Wolf-Hirschhorn syndrome	1387
Steroid hormones	1289	Wolman disease	1388
Sulfite oxidase deficiency	1292		
Synthetic antibodies	1294	X chromosome inactivation	1391
Synthetic genes	1296	Xenopus laevis	1393
		Xenotransplants	1396
Tangier disease	1299	Xeroderma pigmentosum and genetics	1398
Tarui's disease	1301	X-linked periventricular heterotopia	1400
Tay-Sachs disease	1303	XYY syndrome	1403
T-cell immunodeficiency syndrome	1306		
Telomeres	1309	Zellweger syndrome	1406
Thalassemia	1312		
Thalidomide and other teratogens	1315	Biographical Dictionary of Important Geneticists	1411
Totipotency	1317	Nobel Prizes for Discoveries in Genetics	1424
Tourette syndrome	1320	Time Line of Major Developments in Genetics	1431
Transgenic organisms	1323		
Transposable elements	1326	Glossary	1456
Triple X	1329	Bibliography	1486
Tuberous sclerosis	1332	Web Sites	1514
Tumor-suppressor genes	1334		
Turner syndrome and genetics	1337	Category Index	1525
Twin studies	1339	Personages Index	1531
Tyrosinemia type I	1343	Subject Index	1537
Usher syndrome	1345		
Vanishing white matter disease	1349		
Viral genetics	1351
