

CONTENTS

Publisher's Note	ix	Chlorofluorocarbons and related compounds	136
Editor's Introduction	xi	Chlorofluorocarbons and related compounds	138
Contributors	xvii	Climate and the climate system	141
Abrupt climate change	1	Climate change and global warming	143
Acid rain and acid deposition	3	Climate change theories	145
Aerosol Pollutants	8	Climate feedback	149
Air pollution	12	Climate models and modeling	151
Albedo feedback	17	Climate prediction and projection	153
Anthropogenic air pollution and pollutants	20	Climate reconstruction	156
Anthropogenic climate change	23	Climate refugees	158
Aral sea desiccation	27	Climate sensitivity	160
Arctic and global warming	30	Climate variability	162
Arctic ocean	35	Climate zones	165
Atlantic heat conveyor	40	Climatology	167
Atlantic Multidecadal Oscillation (AMO)	42	Clouds and global climate	172
Atlantic Ocean	45	Continental climate	174
Atmosphere	50	Coriolis Effect	177
Atmosphere and climate change	54	Cryosphere	178
Atmosphere: Evolution	58	Cyclones and anticyclones	180
Atmosphere: Global circulation	63	Dating methods for climate change	185
Atmosphere: Structure and thermodynamics	68	Deep ocean currents	187
Atmospheric and oceanic oscillations	76	Deglaciation	191
Atmospheric boundary layer	81	Drought	193
Atmospheric chemistry and climate change	82	Earth-Sun relations	200
Atmospheric circulation	86	Ecosystems' influence on climate	203
Atmospheric dynamics	89	El Niño-Southern Oscillation and global warming	207
Atmospheric inversions	92	Enhanced greenhouse effect	210
Atmospheric opacity	94	Extreme weather events	212
Atmospheric oxygen	97	Fabry quantifies ozone in the upper atmosphere	215
Atmospheric physics	99	Floods	219
Atmospheric sciences	105	Fluid dynamics	225
Atmospheric structure and evolution	111	Fog and regulation of the global climate	228
Average weather in climate studies	116	Forests and the mitigation of anthropogenic climate change	229
Barometric pressure and barometry	118	Fronts and climate change	232
Carbon and carbon dioxide equivalent	123	General circulation models (GCM)	234
Carbon dioxide in Earth's atmosphere	125	Glaciations	236
Carbon equivalent	127	Glaciers	238
Carbon-oxygen cycle	128		
Carbon sink	133		
Catastrophist-cornucopian debate	135		

Global climate	242	Observational data of the atmosphere and oceans	360
Global Climate Coalition (GCC)	245	Ocean dynamics	363
Global economy and climate change	247	Ocean life and rising water temperatures	365
Global monitoring	250	Ocean structure and atmosphere coupling	369
Global positioning system (GPS)	253	Ozone depletion and ozone holes	374
Global surface temperature	256	Pacific Ocean	380
Global Warming in Antarctica	258	Paleoclimates and paleoclimate change	385
Great Lakes	262	Physics of weather	388
Greenhouse gases and global warming	265	Plankton and the mitigation of the greenhouse effect	393
Ground ice and climate change	269	Pleistocene climate	395
Gulf Stream	271	Polar bears and climate change	398
Gyres and climate change	275	Polar climate	401
Hadley circulation and climate change	278	Polar stratospheric clouds (PSCs)	403
Heat vs. temperature	280	Polar vortex	405
Humidity and greenhouse gases	282	Precipitation	406
Hurricanes and typhoons	284	Probability and statistics	411
Hydrogen power	289	Rain forests and the atmosphere	417
Ice ages and glaciations	292	Recent climate change research	420
Ice cores	296	Remote sensing of the atmosphere and oceans	424
Ice shelf collapses	298	Satellite meteorology	430
Icebergs and Antarctica	300	Sea ice and the global climate	436
Ice-out studies	304	Sea levels	438
Indian Ocean	305	Sea sediments and climate change	443
Indicators of Climate Change and Global Warming	310	Sea surface temperatures (SST)	445
Interglacial period	312	Seasonal changes	447
Kilimanjaro’s ice cap	315	Seawater composition	448
La Niña	318	Severe storms	452
Lakes	319	Solar cycle	459
Little Ice Age (LIA)	325	Storm surges	461
Long-term weather patterns	327	Surface ocean currents	462
Maritime climate	331	Thermohaline circulation (THC) and the Thermocline	468
Mean sea level	333	Tornadoes	471
Medieval Warm Period (MWP)	333	Tree rings and climatological information	475
Mediterranean climate	335	Tropical climate	477
Megacities’ effects on local climates	337	Tropical weather	479
Meridional overturning circulation (MOC)	339	Troposphere	483
Meteorology and climate policy	341	Urban heat island (UHI)	486
Methane’s global warming potential	343	Urban heat island (UHI) and Megacities	488
Modes of climate variability	346		
Monsoons	348		
North Atlantic Oscillation (NAO)	353		
North Sea	355		

Volcanoes and climate	491	Timeline of Periods and Events in	
Weather forecasting: Numerical weather		Climate History	523
prediction	498	Glossary	527
Weather modification	503	General Bibliography and Additional	
Weather vs. climate	506	Reading	551
Wetlands and sea-level rise	510	Index	585
Wind	512		
World ocean circulation experiment	516
