

Great Events from History: Women's History

"History is an area where many aspects can be gathered and traced, leading someone down the proverbial rabbit hole on any topic. Finding reputable resources for students to consult as a starting point for research on topics is becoming more challenging each year in this age of internet prowess. **Series and volumes such as those contained within the Great Events catalog at least ensure that the researcher knows the information is from reputable sources, with lists of further reading and additional essays to consult on topics.**

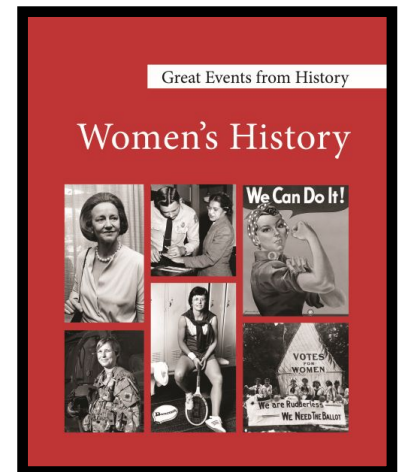

The current volume, *Great Events from History: Women's History*, is a brand-new addition to the *Great Events* series, which includes around 300 essays on a wide range of topics in this area. The timeframe for inclusion in this two-volume set spans over four thousand years — ranging from 2300 BCE to 2021. Entries have been sorted into categories based on the nature of the event, including a description, summary, and significance of the event, keywords, and byline of the contributor. Events have been separated into fourteen distinct topic areas spread across the set, which ranges from activism or education to the workplace or the monarchy.

The articles are easily approachable, beginning with the event's summary, date, and locale, followed by the significance. Most articles are around a single page in length. Events from the current era (e.g., *Obergefell v. Hodges: The United States Supreme Court Legalizes Same-Sex Marriage*) will occasionally be articles of multiple pages and contain insets with information about the legal case, as in this instance."
